

APRIL 27–APRIL 29

The Wisdom of a Select Crowd

It's a pivotal moment in information security—the perimeter, network-based approach has reached its limits and attackers have moved beyond. Your security program must evolve to meet this new world—and CSI SX will show you how.

CSI SX: Security Exchange offers a unique opportunity to meet and interact with security experts and peers in a collaborative and intimate setting limited to 500 attendees. Expert lectures, group discussions, case studies and practical labs at SX look beyond the surface, giving you real and proven solutions that will work in your organization—and prepare you for the security challenges of 2008.

Be a part of this special, focused learning event. CSI SX is large enough to allow for a healthy exchange of ideas but small and friendly enough so that you're able to make contacts and expand your network. You'll leave with a better understanding of both the management and technical components of your job and the strategies to perform them.

Conference Highlights

KEYNOTES

Sunday, April 27

Byron Acohido
USA TODAY Technology Journalist
Author

Monday, April 28

Timothy McKnight
Vice President and CISO
Northrup Gruman

UNIQUE SESSIONS

CSI SX is interactive—offering entertaining ways to learn and network. From the Security Soapbox Derby, where you 'speed-pitch' your ideas (or join the listening group), to Practical Labs where you apply what you just learned, to role-playing to hone your forensics interview skills, you'll spend plenty of time putting your new knowledge into practice and getting to know your colleagues in the process.

ATTENDEE WELCOME RECEPTION

Sunday evening, April 27

After a full day of filling your mind with new knowledge, wind down and swap stories with your fellow attendees at Sunday evening's Attendee Reception—a great place to get to know your colleagues and make connections.

THE HUB

Monday evening, April 28

The Hub is an evening opportunity for a drink and light food, discussion on themes of interest, swag heretofore unimagined, fabulous prizes and games you won't find on the casino floor.

BONUS:
Attendees will have
advance access
to brief executive
summary videos of
all SX sessions.

CSI SX: Conference Sessions

SUNDAY, APRIL 27–TUESDAY, APRIL 29

SUNDAY, APRIL 27
11:00 AM–12:00 PM
The Biggest Secrets of Security Awareness
Transforming Information Security to Information Risk Management
